

Customer Care Information for PVC Edged and Vinyl Wrapped Doors.

PVC and vinyl wrapped doors are a durable and easy to clean product, however there are some limitations on their use in certain applications.

It is our recommendation that all end users are made aware that if **high temperatures** or **excessive water** are present this may cause the edges to peel back, which can result in failure of the product.

Areas for particular caution are:

If Doors are fitted adjacent to ovens, always ensure that they are shielded from heat seepage by using **heat protection strips**. Doors must not be fitted any less than 750mm above a hob. Contact your supplier if you require more information.

Never use appliances that generate heat, such as a toaster, directly underneath a PVC edged or vinyl wrapped door.

Never allow concentrated steam (e.g. from a kettle) to be released directly underneath a PVC edged or vinyl wrapped door.

Never allow a PVC edged or vinyl wrapped door to become saturated with water.

For cleaning use a damp cloth and a non-abrasive domestic cleaner, **do not use bleach**.

With the correct care your doors will give you many years of trouble free service. This customer care information does not affect your statutory rights.
