

# Compact Multi-Point LED Flexible Strip

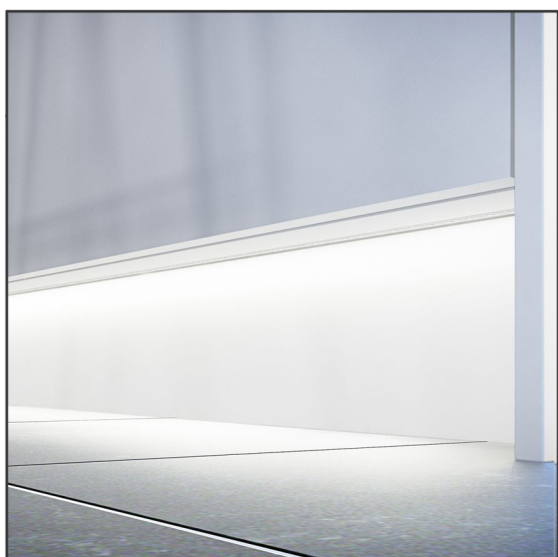

## Specification:

**Wattage:** 3W / 6W / 12W  
**Voltage:** 24V ●  
**LED Qty:** 60 / 120 / 240  
**Kelvin:** Cool White (5500K)  
           Warm White (2900K)  
**Beam Angle:** 120°  
**Life Span:** 50,000 Hours  
**Finish:** Cool White / Warm White  
**Lumen Output - Cool White:** 333lm / 667lm / 1334lm  
**Lumen Output - Warm White:** 311lm / 623lm / 1246lm  
**Length:** 500 x 8 x 2 / 1000 x 8 x 2 / 2000 x 8 x 2  
 (Product dimensions in mm)  
**Dimmable:** Yes, with Sensio dimmers  
**IP Rating:** IP54

## Product code:

**SE10845C0** - Compact Multi Diode LED Flexible Strip - 500mm Cool White  
**SE10845W0** - Compact Multi Diode LED Flexible Strip - 500mm Warm White  
**SE10815C0** - Compact Multi Diode LED Flexible Strip - 1m Reel Cool White  
**SE10815W0** - Compact Multi Diode LED Flexible Strip - 1m Reel Warm White  
**SE10825C0** - Compact Multi Diode LED Flexible Strip - 2m Reel Cool White  
**SE10825W0** - Compact Multi Diode LED Flexible Strip - 2m Reel Warm White

(One light kits of the 1 m and 2m lengths are also available. These packs include; 1 x the length of strip ordered, 1 x driver connection lead and 1 x SE40555 15W LED Driver).

## Key Selling Points:

- A higher number of diodes per flexible strip means there are minimal dark spots, which provides a sleeker finish.
- Quick and easy installation - strips have 3M self adhesive backing tape.
- Male and female ends on the strip allow you to join multiple strips to create the length that you require. A maximum length of 10m is achievable using one 60W driver.
- Scissor icons mark where the strip can be cut every 50mm. Cut the strip once and re-use the cut off piece with the mini-cut connector.
- All you need to install is an adequate number of strips, driver connection lead(s) - one per run of strips and a LED driver.
