

Opus Door Care & Maintenance

The advanced paint & lacquering process used to finish our new Opus doors guarantees a perfect & consistent finish on every door. The finished surface requires some careful steps when cleaning to ensure your doors continue to look as impressive as the day they were fitted. The new colour matched touch-up kits ensure your doors stay looking their best too.

Dusting

The best method is surprisingly straightforward: using a micro fibre cloth or duster, simply wipe your painted furniture clean. Not only does this keep the colour looking fresh and new, it also prevents dirt and dust from collecting on the surface. We also recommend undertaking this process before embarking on any of the cleaning methods detailed below to help avoid dirt and dust scratching the surface.

Regular Cleaning

Minor stains and lightly soiled areas are easily cleaned: mix a small amount of washing up liquid or soap (we recommend using a detergent denoted as 'mild' or 'kind to hands' as this will be more PH neutral) with warm water. Using a clean damp cloth, wipe your painted doors, ensuring you take extra care with any particularly dirty areas. Once it has been cleaned, rinse the item with fresh, clean water to remove any chemicals or soap residue that may be left. Immediately dry with a micro fibre cloth to prevent liquid resting on the surface and causing staining or other damage.

Micro Fibre Cleaning Cloths

Our high quality, odour free and highly absorbent micro fibre cloths guarantee a streak free and lint free finish when cleaning your Avanti doors. Their embedded silver nitrate qualities are specially suited for bathroom and kitchen cleaning due to their bacteria-killing properties.

Opus Door Touch-Up & Repair Kits

The Care & Maintenance Kit is available for repairing minor scuffs, scratches or accidental damage to the surface that might occur after installation.

Chip Marks

Remove any loose particles and apply the softwax to the affected area. Remove surplus using the soft wax applicator. Use the cotton cloth to reduce any difference in sheen level

Scuff Marks

Shake the touch up pen vigorously prior to use. Remove the cap and press the tip down to start the paint to flow. Continue to press until the paint is visible on the tip of the pen. Apply paint to scuff marks and leave paint to dry for 10 minutes

Code	Touch-Up Kit Colour
