The tandem runner system is Blum's premier solution for wooden drawers and pull-outs. Concealed runner technology fits to the inside face of the drawer side at the base. The main advantage of this system is that it does not detract from the natural look of the drawer and is therefore ideal for traditionally styled furniture. The unique locking device allows easy removal of the drawer and installation onto the runners. Integrated Blumotion offers luxurious smooth closing which saves the contents of the drawer and the drawer itself from damage.

AVENTOS HK-S is the right solution for small wall cabinets and for fitted units, e.g. above larder units or refrigerators. The fitting fits snugly into small furniture and ideally rounds off the existing programme of AVENTOS lift systems.

Blum Aventos HK-S Lift System

Code	Power Factor
39512	Unsprung
23512	Medium
11231	Heavy

- Cabinet heights up to a max. of 600 mm
- Cabinet widths depend on the power factor
- 3 lift mechanism types
- Can be used with cornice and crown mouldings
- Lift mechanisms and front fixing brackets can be used symmetrically
- For wooden and aluminium fronts

AVENTOS HK-XS offers a high level of design freedom for small top wall cabinets, thanks to its narrow style. In this way, even cabinets with low internal depths can be equipped easily e.g. above the stove in the kitchen or the sink in the bathroom. The symmetrical lift mechanism can be used on one or two sides. When used on both sides, even larger, heavier fronts are possible.
