Color Woodgrain
Melamine Faced Boards

The look and feel of painted wood, the durability of melamine

Creating the desirable 'painted wood' effect, but with the durability you get from a melamine finished board, this is a sophisticated combination of contemporary colours on a textural wood grained surface. By blending the consistency and workability of Melamine Faced Boards with a realistic timber finish, on-trend neutral shades, plus the ever popular black, you can have the look without the hassle.

And now you can even paint your own: as an extra option we have a new 'Painting Grade White*' decor, a ready-to-paint wood grained board to finish with your own choice of colour.

These are just part of the complete Kronospan® collection of over 170 decors, view the full range online.

11 NEW Color Woodgrain Melamine Faced Boards
