Tools required

Pencil

Ø 44mm
Hole opener

Power Drill

Important Safety Information

Please read these instructions carefully before attempting to install this product. It is advisable to keep these instructions in a safe place for future reference.

We recommend that you consult a qualified electrician. All electrical installation must be carried out in accordance with current IEE wiring regulations (BS7671).

These products must not be modified, if any modification are made, it may invalidate the warranty and may render the product unsafe. These LED lights operate low voltage (24V).

Do not wire the individual LED light fittings directly to the mains. This product should be used indoors only.

- Consult a qualified electrician if in doubt as to the correct installation of the luminaire.
- The appliance must be scrapped if supply cord damaged.
- Install on smooth flat surface(s) only.
- Do not exceed or stretch the cable length of each LED wire.
- The appropriate driver must be used with this product.
- The appropriate 24V driver must be used with this product.
- This luminaire must be installed in accordance with all relevant local Building Regulations.
- The LEDs in this luminaire are non-replaceable.

Safety Instructions

1. Before commencing installation or maintenance, isolate the main electrical supply for the appropriate circuit at the fuse board.
2. This product is only suitable for connecting to a 240V 50Hz supply with use of a 24V driver.
3. The lights should be mounted onto a secure surface.
4. Never exceed the total output of the LED driver.

5. Suitable for furniture lighting.
6. When the lamp expires the fitting must be replaced
7. Class III safety extra low voltage (SELV).

Waste Electrical & Electronic Equipment (WEEE)

The symbol on the product, or on the document accompanying the product, the crossed out wheellie bin symbol, indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic waste.

RoHS
Compliant ✓

Installation

These fittings simply daisy chain together, each have a length of pre-wired cable containing a plug on the end, allowing each fitting to be co-joined with another fitting.

Mark out where the locations for your plinth lights should be. Using the hole opener, cut four 44mm holes in the plinth at your required locations.

Feed the wire from the first fitting through the cut out hole. The light will clip into place. Repeat for each fitting.

Connect each fitting to the previous via the connection plugs on the end of each fitting.

The connector on the end of the last fitting will then connect to the driver distribution block (shown in the diagram to the left).

The driver can then be connected to the mains supply and the power supply can be turned back on.

Wiring diagram

Maintenance & Care

- Ensure that the power is disconnected prior to cleaning.
- To keep the finish of this product, wipe over with a soft cloth periodically.
- Do not use harsh chemical solvents, this may dis-colour or damage the finish.
