**Cable Length:** 2m

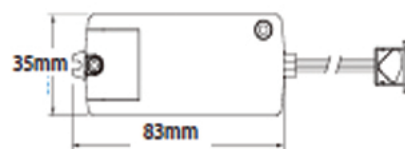

**Detection Range:** 5 - 10cm

**Cut Out:** 13mm

## Operation:

## Dimensions (mm)

## Key Selling Points:

- Detection range of 5-10cm. Recess into internal shelves in wall units or wardrobes. When the door is opened all connected lighting are switched on and switched off when the door closes.
- Can be used with 12V, 24V or 240V fittings which do not have integrated switches or sensors.
- High wattage of 250W means the sensor will run a large number fittings.
- The light(s) will switch on once the door opens as the sensor detects that the door is no longer blocking it, then be switched off when closed.
- Very discreet switching option, especially in darker furniture.
- Can be used in kitchens or bedrooms.
